

Project Title	Funding	Institution
Simons Variation in Individuals Project (VIP) Site	\$508,680	University of Washington
Role of the 16p11.2 CNV in autism: genetic, cognitive and synaptic/circuit analyses	\$0	Broad Institute, Inc.
ACE Center: Neuroimaging signatures of autism: Linking brain function to genes and behavior	\$178,857	University of California, Los Angeles
Simons Variation in Individuals Project (VIP) Site	\$624,864	Boston Children's Hospital
Simons Variation in Individuals Project (Simons VIP)	\$372,288	Emory University
Identifying the gene in 17q12 responsible for neuropsychiatric phenotypes	\$228,375	Geisinger Clinic
Genome-wide identification of variants affecting early human brain development	\$590,292	University of North Carolina at Chapel Hill
Simons Variation in Individuals Project (VIP) Functional Imaging Site	\$1,142,798	University of California, San Francisco
Simons Variation in Individuals Project (VIP) Core Neuroimaging Support Site	\$434,182	University of California, San Francisco
Characterizing the genetic systems of autism through multi-disease analysis	\$503,306	Harvard Medical School
Relating copy number variants to head and brain size in neuropsychiatric disorders	\$399,146	University of California, San Diego
A gene-driven systems approach to identifying autism pathology	\$249,874	University of California, San Francisco
Role of myelinating cells in autism spectrum disorders	\$60,000	University of California, San Francisco
Social processing, language, and executive functioning in twin pairs: Electrophysiological and behavioral endophenotypes	\$0	University of Washington
Simons Variation in Individuals Project (VIP) Imaging Analysis Site	\$159,805	Harvard University
Simons Variation in Individuals Project (VIP) Principal Investigator	\$123,623	Columbia University
Identification of candidate genes at the synapse in autism spectrum disorders	\$168,245	Yale University
Simons Variation in Individuals Project (VIP) Statistical Core Site	\$221,381	Columbia University
Genetic investigations of motor stereotypies	\$124,538	Yale University
Factors influencing early associative learning as a precursor to social behavior heterogeneity	\$54,500	University of Southern California
ACE Center: Genetic and genomic analyses to connect genes to brain to cognition in ASD	\$241,951	University of California, Los Angeles
A neuroimaging study of twin pairs with autism	\$599,326	Stanford University
Simons Variation in Individuals Project (VIP) Site	\$316,306	Baylor College of Medicine
Statistical methodology and analysis of the Simons Simplex Collection and related data	\$80,389	University of Pennsylvania
Biological determinants of brain variation in autism	\$652,672	University of Wisconsin - Madison
Comprehensive phenotypic characterization of the 17q12 deletion syndrome	\$125,000	Weis Center for Research - Geisinger Clinic
A family-genetic study of language in autism	\$308,419	Northwestern University
Characterization of infants and toddlers with the 16p copy-number variation	\$149,372	Boston Children's Hospital
Language processing in children with 22q11 deletion syndrome and autism	\$0	Emory University
Developmental neurogenetics in adolescents with autism	\$249,603	Yale University

Project Title	Funding	Institution
Animal model of genetics and social behavior in autism spectrum disorders	\$658,361	Duke University
High throughput sequencing of autism spectrum disorder (ASD) endophenotypes	\$39,432	Baylor College of Medicine
Children with 7q11.23 duplication syndrome: shared characteristics with autism	\$250,000	University of Louisville
Simons Variation in Individuals Project (VIP) Recruitment Core and Phase 2 Coordination Site	\$168,626	Geisinger Clinic, Weis Center for Research
Simons Variation in Individuals Project (VIP) Recruitment Coordination Site	\$216,139	Weis Center for Research - Geisinger Clinic
A collaborative translational autism research program for the military.	\$966,000	Nationwide Children's Hospital
Simons Variation in Individuals Project (VIP) Functional Imaging Site	\$419,819	The Children's Hospital of Philadelphia
Simons Variation in Individuals Project (VIP) Structural Imaging and Phenotyping Site - SCAP-local	\$260,788	The Children's Hospital of Philadelphia
Development of vision and attention in typical and ASD individuals	\$305,682	Brown University
A system-level approach for discovery of phenotype specific genetic variation in ASD	\$29,500	Hebrew University
The Role of Shank3 in Neocortex Versus Striatum and the Pathophysiology of Autism	\$25,000	Duke University
Beta-catenin signaling in autism spectrum disorders	\$60,100	University of Illinois at Chicago
Assessing the Cognitive Deficits Associated with 16p11.2 Deletion Syndrome	\$59,734	Posit Science Corporation
VIP Family Meetings	\$121,016	VIP Family Meetings
Simons Variation in Individuals Project (Simons VIP) Functional Imaging Site and Structural Imaging/Phenotyping Site	\$0	Children's Hospital of Philadelphia
The genomic bridge project (GBP)	\$158,206	Massachusetts General Hospital
Identification and Functional Analysis of Risk Genes for Autistic Macrocephaly	\$0	Institute of Psychiatry/King's College London
Speech disorders in individuals with 16p11.2 deletion or duplication	\$40,000	University of Wisconsin
Autism Linked LRRTM4-Heparan Sulphate Proteoglycan Complex Functions in Synapse Development	\$0	University of British Columbia
